Catalan Exhibitors

Mobile World Congress 2016

Generalitat de Catalunya
Government of Catalonia

Catalan Exhibitors

Mobile World Congress 2016

The industrial tradition and commitment to innovation of Catalonia and Barcelona, plus the effort made by Catalan companies in recent years to position themselves on overseas markets, have helped to consolidate Catalonia and it business fabric internationally.

Crucial to this positioning is Catalonia's pledge to Information and Communication Technologies (ICT), a sector that in recent years has been generating new economic activities and opportunities, the role of which as a key enabling technology directly influences all economic sectors and is a crucial factor in the competitiveness of Catalan companies.

With this spirit of business and productive development, for over a decade now Barcelona has been hosting the Mobile World Congress, an event that is being held this year for the eleventh time. At successive editions, the Government of Catalonia has helped over 200 companies to take part. This catalogue contains information on the Catalan companies and technology centres that are attending this year's Congress and are present in the Government of Catalonia Pavilion, in the App Planet zone, at the 4YFN and in the Spanish Pavilion, on companies taking part with their own stand and on other companies from the sector. They all represent commitment to the innovation, internationalisation and diversification of the sectors at which their products and services are targeted.

This outstanding presence of Information and Communication Technologies companies and research centres, plus Barcelona's status as Mobile World Capital, has prompted an ecosystem of innovation that helps to attract investment to our territory and has made Catalonia and Barcelona leaders in the mobile technologies sector. Indeed, in the period from 2010 to August 2015, Catalonia attracted 56% of foreign investment in business R&D, which makes us leader in this area in Western Continental Europe.

As a demonstration of Catalonia's potential in the Information and Communication Technologies sector, I hope that this catalogue represents yet another element to help the development and positioning of our companies in the world.

I hope that for yet another year the Mobile World Congress is a success for every participating company and for all visitors.

Jordi Baiget i Cantons
Honourable Minister for Business and Knowledge

Catalonia Trade & Investment

Come to Barcelona and join a dynamic mobile business community.

95,000 professional visitors are expected to attend the Mobile World Congress 2016

The ICT sector in Catalonia has traditionally been of special importance. Thanks to a strong consumer electronics presence, a highly competitive software development sector and being one of the biggest industrial clusters in Europe, Catalonia offers a great environment that has produced major initiatives applying mobile technologies to traditional activities.

From 2012 to 2023 Barcelona will be the Mobile World Capital. This means that not only the international flagship mobile event will be held yearly here, the GSMA Mobile World Congress, but a whole range of activities and programmes all year around will create a dynamic professional ecosystem for the mobile and its satellite industries.This initiative has transformed Barcelona into the permanent global centre for mobile technologies, has involved the development of a business environment focused on this type of industry on an international level and has made Barcelona a global benchmark for mobile transformation.

New sectors like e-commerce or digital gaming are growing thanks to its business advantages and to the projects taking place in Barcelona as a result of the city being Mobile World Capital. One of the biggest pools of skilled workforce in Europe and the appeal of the city as a place to live and work have also progressively consolidated a hub of talent and opportunities on a European level.

How can your company take advantage of this dynamic environment?

Many public-private projects are channeled through the **Mobile World Capital Foundation**.
The capital also provides different opportunities for start-up initiatives as a hub (space for companies): privileged contact with key operators, networking opportunities, awards, among many others.

If your company has a project, Catalonia Trade & Investment can help you settle and develop it in Barcelona and Catalonia

Catalonia Trade & Investment has a 30-year experience helping international companies and can provide specific advice on local tax rebates and special social security contributions. Catalonia Trade & Investment also offers reduced office rental prices, recruitment, access to tech centers and contact with other companies for Mobile Tech Projects.

Catalonia Trade & Investment's services:

Information and Advice

Whatever your sector and needs, we've got the information: how to set up in Catalonia, full breakdown of the legal, tax and labour context, compared competitive analysis…

Investment Project Management

We offer tailor-made solutions to each investor. We aim at guaranteeing the viability of your investment right from the word go.

Growth and Expansion

We stay with you as your business grows and support your project through all phases of growth, expansion, diversification and relocation.

Specialized services

- Advice on incentives and financing
- Finding business location and offices
- Finding partners, suppliers and specialized workers
- Information on procedures on mobility for executives

6TL, headquartered in Barcelona, Spain, and with systems deployed in more than 30 countries, has over 30 years of expertise delivering solutions for the electronics test market.
6TL has redefined the way ATE integrators build their systems. Using commercial off-the-shelf (COTS) hardware and software blocks, integrators can shorten project delivery and build cost-effective, reliable solutions.
With 6TL's FastATE technology, test engineers do not have to address the recurrent tasks of every project since an 6TL module already completes most of these tasks for them. This module is a high-level block that covers one needed recurrent function of the ATE.

Government of Catalonia

4YFN

4YFN (Four Years From Now) is an international meeting created for mobile sector entrepreneurs, organised by the **GSMA** and the **Barcelona Mobile World Capital** within the framework of the **Mobile World Congress 2016**. It represents a prelude for the companies that we hope will one day make the jump to the Mobile World Congress. With three days of inspirational content, workshops and sessions to connect opportunities and needs (founders & investors), it is a great platform for start-ups to present themselves to the world. The **4YFN** event is divided into three main themes, one per day: **Disrupt by Mobile**, (22nd), **Internet of Things** (23rd) and **Digital Media** (24th). On the 25th, entrepreneurs will have access to the Gran Via congress area so they can take part in the final day of the MWC.

Its third edition will be held this **February 22nd-25th**, at Pavilion 8 in the Fira de Barcelona at Montjuïc.

It is aimed at:

An international public, made up of start-ups, investors and executives from large companies attending the MWC.

The **Government of Catalonia**, via **Catalunya Emprèn** and the **Catalan Institute for Cultural Companies**, is present in the 4YFN with 26 Catalan companies, which will be distributed into two stands, 18 in one and 8 more in the second. With this activity, Catalonia positions itself as one of Europe's most recognised, dynamic and promising start-up ecosystems.

4YFN has become southern Europe's leading technological and digital start-up event.

VOJO is a dynamising agent for local commerce. By delocalising user/provider relations through disruption, we create a direct, real time link that helps generate sustainable wealth.
At the heart is Vojo PRO, our web platform aimed at professionals and local businesses, flexible and sector non-specific.
We apply this business model through our two tourism applications, Vojo Way, for rural pathways, and Vojo City, for city routes.
Through the use of these apps, Vojo helps travellers create personal routes, generate experiences on journey, connect with other travellers on the same route, and discover offers and services nearby in real time.

ACCIÓ

enterprise europe network

Business Support on Your Doorstep

European Commission

Enterprise Europe Network (www.een.cat) is an international network of close to **600 partners from 62 countries** with **more than 3,000 local experts** ready to **help you find the right partners and grow your business through innovation.**

ACCIÓ, the Catalan Agency for Business Competitiveness, as a member of the network, organizes year after year at the **Mobile World Congress** a B2B matchmaking event (Brokerage Event).

The **Brokerage Event** is organized to enhance opportunities for companies to explore and find international partners from the mobile technology industry.

The MWC Brokerage Event is for a great opportunity for:

- Small and medium-sized enterprises, offering and/or **looking for new technologies.**
- Scientist/research institutes **offering innovative R+D solutions.**
- Start-up companies and **entrepreneurs.**
- Operators interested in meeting innovators and added-value service providers.

The 11th edition of the Brokerage Event will take place once again at the Catalan Pavilion. The event has supported companies and institutions worldwide in creating opportunities and finding partners for international cooperation since 2006. Once again, we seek to exceed your expectations!

Highlights since 2006

smartCATALONIA

Generalitat de Catalunya
Government of Catalonia

On **28 October 2014**, the Government of Catalonia approved **Catalonia's Smart Strategy** (smartCATALONIA) to deploy smart initiatives throughout the region.
SmartCATALONIA, which is aligned with the European Commission's Europe 2020 strategy, aims to turn Catalonia into a leading international Smart Region to take advantage of the use of technology and digital information to innovate in public services, boost economic growth and become a more intelligent, sustainable and inclusive society.

In addition, **smartCATALONIA** meets the objectives and follows the policies set out in the Digital Agenda for Catalonia (idigital) and Catalonia's Research and Innovation Strategy for Smart Specialisation (**RIS3CAT**).

The rollout of the strategy will involve the implementation of smart projects and initiatives throughout the territory, under the purview of the Government of Catalonia, in the fields of mobility, environment, security, education, health and tourism, among others.

Furthermore, a new industry of data is being built, with strong commitment on the emerging technological sector of bigdata.

ACCIÓ

Generalitat de Catalunya
Government of Catalonia

ACCIÓ is the agency set up by the Catalan Government to make Catalan enterprise more competitive throughout the world. Its key aims are to promote business growth, drive innovation, internationalisation and attract inward investment.

ACCIÓ functions:

- Developing business competitiveness
- Encouraging the internationalisation of Catalan firms, their expansion and consolidation
- Promoting Catalonia as a business-friendly location
- Encouraging R+D and business innovation, as well as technology transfer
- Fomenting the creation of technological and high-growth potential start-ups

To promote internationalization and innovation, ACCIÓ counts on a network of 36 Trade and Investment Offices across the globe based at the main economic cities, operating in markets spanning 80 states. Our Trade and Investment Offices provide Catalan business qualified support, insight and advice in international trade and investment.

Trade and Investment Offices closely monitor market trends and analyse potential risks. Services provided are tailor-made depending on specific company needs and level of presence in chosen markets, from creating demand to giving support in productive investment and logistics:

- Market research
- Search for marketing channels: distributors, agents, customers, etc.
- Search for supply chains: suppliers, manufacturers, etc.
- Search for trade and technological strategic alliances
- Setting up: business location, legal and labour advice, partnership opportunities, etc...
- Trade missions
- Contact follow-ups and business networking
- Recruitment of qualified staff

Our offices also offer guidance to international firms on opportunities and inward investment to Catalonia.
