MOBILE WORLD CONGRESS 2014

1714 / 2014

Generalitat de Catalunya
Government of Catalonia

Catalan Exhibitors

MOBILE WORLD CONGRESS 2014

Throughout its history, Catalonia has always been characterized by the enterprising, dynamic and embracing spirit of its citizens. These factors contributed greatly to Catalonia leading the industrial revolution in Southern Europe and have shaped an industry-based economy which is well known by its innovation and openness to new technologies.

We want to consolidate this industrial foundation by strengthening the openness of our economy and its competitiveness. We aim to achieve this by making the most of the talent and creativity that provides a varied business fabric and an in-house system of research of excellence, which fosters an environment in which multinationals, local businesses, consolidated international industry leaders and emerging technology sectors can coexist.

One of these emerging sectors is that of the information and communications technologies (ICT), defined in their broadest sense as one of the priorities of the Catalan Research and Innovation Strategy for Smart Specialisation (RIS3CAT). ICT is an up-and-coming sector, one which has multiple applications and an important impact on our daily lives.

1714 2014

It encompasses over 5,200 companies and provides employment to 69,000 workers in Catalonia, making it Southern Europe's main ICT cluster.

The companies and technology centres that appear in this catalogue are a good example of players that may be small but have a specific talent and knowledge that makes them leaders in their field of expertise. In this sense, they can offer high added value for international value chains.

The business fabric provided by these players, along with Barcelona being named Mobile World Capital until 2018, contributes to the creation of an ecosystem that favours industry development and attracts investment.

Dedicated to strengthening this industry, we will continue to support Catalan companies' participation in the Mobile World Congress, a commitment of which this catalogue is a reflection. This is just a small taste of the potential that lies hidden in the ICT sector in Catalonia.

invest
IN CATALONIA

Come to Barcelona and form part of a dynamic mobile business community

28% of internet connections were performed on mobile devices in 2013, a 67% increase over the previous year.

The ICT sector in Catalonia has traditionally been of special importance. Thanks to a strong consumer electronics presence, a highly competitive software development sector and the presence of one of the biggest industrial concentrations in Europe, there is a great environment for mobile centered companies.

Today, Catalonia's strong ecosystem of interconnected digital clusters has produced major initiatives applying mobile technologies to traditional activities. Through private schemes or via public-private collaborative projects under the auspices of Barcelona Mobile World Capital, progress has been made in many areas. This has given fruit to a series of innovative projects such as the Personal Health Folder for the health sector, Sonar+D for creative industries and apparkB in the mobility & parking area.

Barcelona's efforts in mobile technologies and mobility have made it the only city in the world where citizens can access an online site – Apps4bcn – and find the most interesting APPs in terms of citizen-city interaction.

The presence of the Mobile World Congress (with 75,000 professional visitors expected this year) and the projects taking place in Barcelona as a result of the city being Mobile World Capital, have increased the existing network of companies with significant presence in sectors like e-commerce or digital gaming. These factors, along with one of the biggest pools of skilled workforce in Europe and the appeal of the city as a place to live and work, have all progressively consolidated a hub of talent and opportunities on a European level.

How can your company take advantage of this dynamic environment?

Many public-private projects are channeled through the Mobile World Capital

Foundation. The capital also provides different opportunities for start-up initiatives as a HuB (space for companies) privileged contact with key operators, networking opportunities, awards, and so on.

If your company has a project, Invest in Catalonia can help you establish it in Barcelona and Catalonia

More than 50 new business plans by companies are supported by Invest in Catalonia every year. Besides the services listed below, Invest in Catalonia can provide specific advice on local tax rebates, special social security contributions, and reduced office rental prices for Mobile Tech Projects.

Other services:

Information for incoming companies

Whatever your sector and needs, we've got the information: how to set up in Catalonia, legal, tax and labour framework, socioeconomic context, investment opportunities...

Finding business location, partners, suppliers and specialized workers

When looking for a location for your investment project, we do all the groundwork, you get all the options.

Specialized services

> Investment project management
> Advice on incentives and financing
> Global Partnership (looking for a merger or an acquisition? Invest in Catalonia can help you)

Expansion and development

Ongoing support for companies operating in Catalonia: setting up opportunities, advice on new investments, intermediation or strategic facilitators.

antonio.duran@massfactory.com

OnTheBus helps transit riders plan trips and get to their destination as quickly as possible.

The app goes far beyond timetables to offer real time departure and arrival information, trip planning and point-to-point navigation across public transit options (bus, tram, metro, etc.).

By combining transit data from public sources (like transit authorities) with live inputs from the crowd, OnTheBus gives a complete real-time snapshot of what the trip will be like so users can save time.

Our users and us are socially responsible: we support an inclusive and accessible app that even visually impaired persons can use.

ShareisFashion

Computing.

On 11 July 2011, Barcelona was named Mobile World Capital for the seven-year period from 2012 to 2018. Mobile World Capital is a development engine integrated within the country's strategy of growth and internationalization. This global ambition requires a commitment and a complicity of all key stakeholders including the five founding partners: GSMA, The Catalan government, Barcelona City Council, the Spanish Ministry of Industry, Energy and Tourism and Fira de Barcelona.

The aspiration of Barcelona Mobile World Capital is to promote the generation of the optimal conditions for the activity between the economic agents to multiply the impact and transform the country into a global reference of the mobile transformation.

This is achieved through 5 main programmes:

> Programme Europe

Seeks to position Mobile World Capital as a relevant partner in the European agenda through the alignment of programmes with the European vision. Smart, Sustainable, Inclusive.world.

> Entrepreneur and Innovation Programme - PEI

The PEI Program was born to help to the entrepreneurship movement, following the efforts of other existing initiatives – commercial channel, funding, incubation, etc, boosting global innovation and support of the local entrepreneurial movement.

Generalitat de Catalunya
Government of Catalonia

> Competence Centre Program – PCC

Managing strategic plans for the mobile transformation of social and economic dimensions with special focus on the alignment of European priorities. It is divided in three different areas: mHealth, promoting the improvement of the welfare and health of citizens by personalizing services based on mobile technology; mEducation, reinforcing all areas of learning and teaching, from preschool to universities, based on mobile technologies; and mSmartCities that focuses on the development of mobile tools to improve the city.

> Mobile Transformation Programme - PTM

PTM focuses on the mobile transformation of the local business ecosystem.

Fostering mobile initiatives between the strategic economic sector and the technological enterprises that represent a high percentage of Catalan GDP.

The goal is to define, identify and action mobile initiatives to promote and transform these sectors.

> m4all Programme

The mission of m4all is to improve quality of all citizens despite their disabilities or their risk of social exclusion thanks to mobility. Mobile technology to empower citizens, civil society organizations, private sector and governments to build a more inclusive and fair society for all.

ACCIÓ

Generalitat de Catalunya
Government of Catalonia

ACCIÓ is the agency set up by the Catalan Government to make Catalan enterprise more competitive throughout the world. Its key aims are to promote business growth, drive innovation, internationalisation and attract inward investment.

ACCIÓ is enterprise-centred, working on the needs of each individual business and to work hand in hand to look for opportunities and achieve that all important competitive edge.

ACCIÓ functions

> To create companies, foster entrepreneurship and business promotion in technological activities

> To increase the number of regular exporting companies

> To diversify and consolidate internationalization markets of Catalan companies

> To boost the capacity and the innovative demand of Catalan enterprises (R&D&I)

> To offer knowledge transfer and incorporate research and new technologies into enterprise

> To promote talent and creativity

> To develop business competitiveness

To promote internationalization ACCIÓ counts on a network of 34 Business Promotion Centres across the globe based at the main economic cities, operating in markets spanning 80 states.

Generalitat de Catalunya
Government of Catalonia

Our Business Promotion Centres provide Catalan business qualified support, insight and advice in international trade and investment.

Business Promotion Centres closely monitor market trends and analyse potential risks. Services provided are tailor-made depending on specific company needs and level of presence in chosen markets , from creating demand to giving support in productive investment and logistics:

> Market research

> Search for marketing channels: distributors, agents, customers, etc.

> Search for supply chains: suppliers, manufacturers, etc.

> Search for trade and technological strategic alliances

> Setting up: business location, legal and labour advice, partnership opportunities, etc...

> Trade missions

> Contact follow-ups and business networking

> Recruitment of qualified staff

Many centres also offer guidance to international firms on opportunities and inward investment to Catalonia.

idigital

Generalitat de Catalunya

On 22 May 2012, the Government of Catalonia approved a new strategy to fully develop the Catalan digital society as a tool for economic recovery: the Idigital Plan (**www.idigital.cat**).

The aim of **idigital** is to place information and communication technology (ICT) at the forefront of a strategy to transform Catalonia. We have set the objective of making Catalonia a Digital Innovation HUB to revive the economy and create wealth and jobs.

Idigital is in line with the Digital Agenda for Europe 2020 and concentrates all the agents involved in the development of the digital society in Catalonia. The plan promotes collaboration and coordination between the different agents engaged in this endeavor.

Projects and initiatives of the idigital plan promote the named 5 "I"s, those aspects in which we have to excel in order to face with guaranties our present and immediate future: internationalization, innovation, investment, inclusion and infrastructures.

Generalitat de Catalunya
Government of Catalonia

Business Support on Your Doorstep

European Commission

Enterprise Europe Network (http://een.ec.europa.eu) is an international network of close to 600 partners from over 50 countries with 3000 local experts ready to help you find the right partners and grow your business through innovation.

ACCIÓ, a department of the Catalan Government's Ministry of Enterprise and Labour, as a member of Enterprise Europe Network organizes the **Brokerage Event,** a matchmaking event that takes place every year at the Mobile World Congress. For more information please visit: **www.b2match.eu/mwcbrokerage2014**

The MWC Brokerage Event is the ideal environment for:
> Small and medium-sized enterprises, offering and/or looking for new technologies.
> Scientist/research institutes offering innovative RTD results.
> Start-up companies and entrepreneurs.
> Operators willing to meet innovators and added-value service providers.

The purpose of the Brokerage Event is to enhance opportunities for companies to explore and find partners from the mobile technology sector.

2013 Highlights

Over **500** companies   From **29** countries   Almost **1600** meetings

92% of the participants were satisfied with the event

93% of the companies would participate again

"I only have one week of battery left on my mobile."
