

Catalan Exhibitors

Mobile World Congress 2019

Barcelona, 25-28 February

Generalitat de Catalunya
Government of Catalonia

Catalan Exhibitors

Mobile World
Congress 2019

Quim Torra i Pla

President of the Government of Catalonia

For yet another year, the world is watching us. Catalonia welcomes one of the biggest events in the world over the next few days: the Mobile World Congress (MWC). This is an opportunity for us to show the world the commitment of our country and businesses to leading the way in this digital revolution.

It is no accident that Barcelona has become the mobile world capital. Catalonia, with Barcelona at the forefront, has managed to make a place for itself among the world's leading nations in the fields of innovation, research, technology and knowledge. We are an entrepreneurial, innovative country, made up of smart cities and territories and open to the world.

Catalonia has everything it needs to successfully head up this revolution thanks to its powerful, robust and exceptionally healthy ICT sector, equipped with talent and an entrepreneurial and innovative ecosystem that ranks us among the great regions of the future. Without a doubt, this success is the result of the excellent work carried out by the Catalan companies that make up today's ICT sector. A sector that has grown in importance over the last few years and now generates 8% of GDP and employs 3.5% of the population. All this

translates into wealth generation and the creation of quality jobs, which promise a future and the arrival of new opportunities.

Thanks to these attributes, Catalonia is in a privileged position to lead this digital revolution, which represents a change in our social structure, productive fabric and culture, and opens up a wide spectrum of possibilities, which we need to know how to harness.

However, to become this place of opportunities and make full use of the country's potential power, we need to overcome the obstacles put in our path by the Spanish state. There are currently nine politicians in prison for having organised a referendum and defended the citizens' right to a vote. Then there is president Puigdemont and several Catalan ministers and politicians who are in exile to avoid a political repression that has no place in the Europe of the 21st century.

With all this, our country is determined to become a place of opportunities and offer all the dynamism required to achieve it. Ultimately, we have all the ingredients, including a Government that fully supports you in leading this digital revolution.

Barcelona, the Mobile World Capital. Catalonia, your Tech Hub.

Catalonia has always had a strong industrial sector, which has today become an eager mobile industry client: ICT, business solutions, retail and smart cities represent the sectors with which mobile companies more frequently work. Other important sectors include transport, health and public services. ICT is also closely related to activity in **Smart Cities**, the **Internet of Things**, **m-health**, **gaming**, **e-commerce**, **5G**, all of which are highly active sectors in Catalonia.

From 2012 to 2023 Barcelona will be the Mobile World Capital. This means that not only the international flagship mobile event will be held yearly here, the MWC Barcelona, but a whole range of activities and programmes all year around will create a dynamic professional ecosystem for the mobile and its satellite industries. This initiative has transformed Barcelona into the permanent global centre for mobile technologies, has involved the development of a business environment focused on this type of industry on an international level and has made Barcelona a global benchmark for mobile transformation.

New sectors like e-commerce or digital gaming are growing thanks to its business advantages and to the projects taking place in Barcelona as a result of the city being Mobile World Capital. One of the biggest pools of skilled workforce in Europe and the appeal of the city as a place to live and work have also progressively consolidated **a hub of talent and opportunities** on a European level.

How can your company take advantage of this dynamic environment?

Many public-private projects are channeled through the **Mobile World Capital Barcelona**. The capital also provides different opportunities for start-up initiatives as a hub (space for companies): privileged contact with key operators, networking opportunities, awards, among many others.

Catalonia Trade & Investment helps international companies locate and grow in Catalonia and Barcelona.

Catalonia Trade & Investment is the Catalan Government agency for foreign investment and business competitiveness. With more than 5,600 investment projects managed and over 30 years' experience helping international companies operate in Catalonia, we know how to maximise the return on investment.

Catering to the needs of all international investors:

- Are you considering a new investment?

We can help your company to take the right decisions, providing the necessary added-value information.

- Do you need us to accelerate your investment in Catalonia?

Our project management services give personalised support to your investment right from the start.

- Do you want to grow, reinvest & expand your investment in Catalonia?

Aftercare, expansion and reinvestments are one of our priority activities.

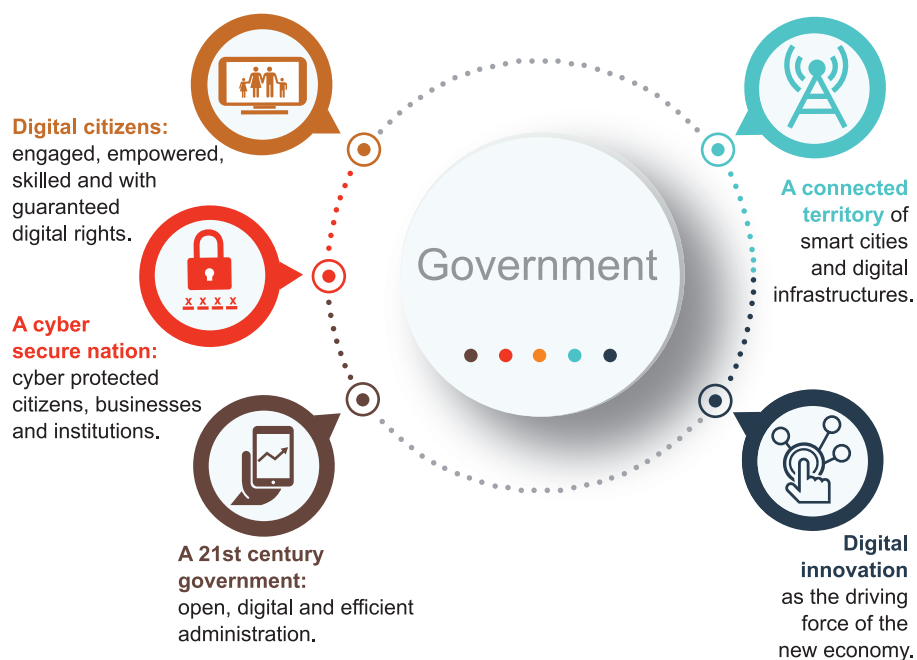

Specialised one-stop-shop services

- Investor information
- Business location
- Financing & incentives
- International mobility for executives
- Innovation, tech & business partners
- Business and institutional network
- Supplier search

The Government of Catalonia is developing a nation-wide ICT strategy to position Catalonia as a worldwide Digital hub.

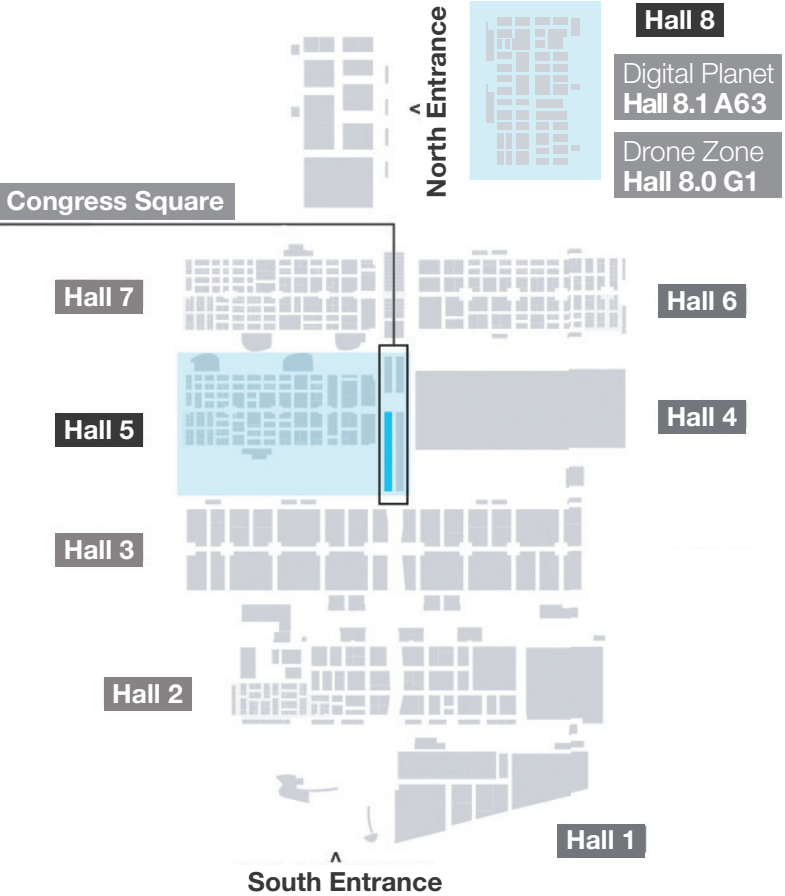

The Ministry for Digital Policy and Public Administration was created to support the growing Catalan ICT sector, and to promote a Digital Agenda to accelerate the digitalisation of our economy, to generate more opportunities, attract talent and invest in the skills of the future, and to democratise innovation.

Digital Catalonia sets the following strategic axis:

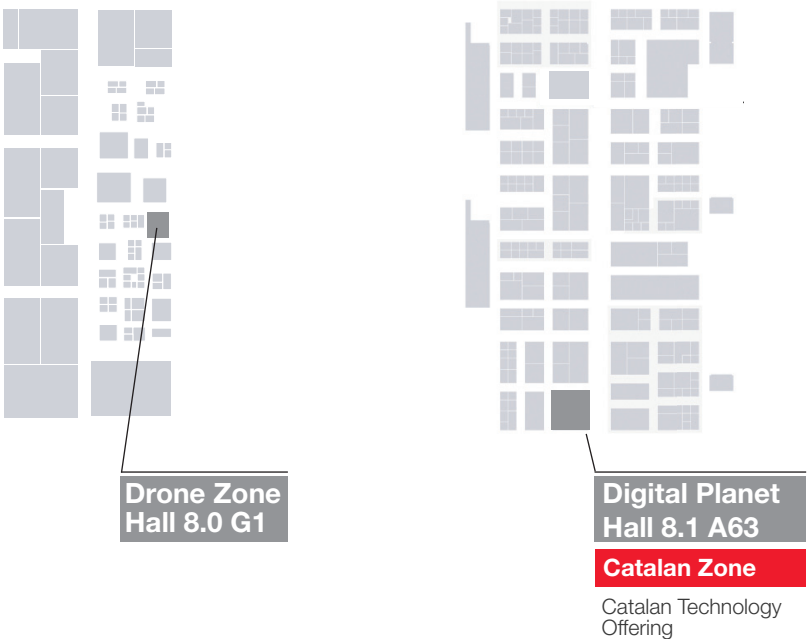

Generalitat de Catalunya
Government of Catalonia

Air-Fi builds Real Time Location Services. Based on our proven, flexible and accurate Indoor Positioning technology we build solutions to enable tracking, guidance, analytics and hyper targeted communication. Indoor Positioning Systems (either via WiFi, BLE or Ultra-Wide Band) provide accurate location, routing, and guidance for people inside closed environments such as commercial malls, hospitals, airports, factories where GPS signals cannot penetrate. These IPS applications can be very useful in monetizing existing Wi-Fi systems already installed in addition to making it easy for shoppers/patients/workers to find and locate their points of interest and additional geotargeted information inside commercial malls/hospitals/plants.

At **Gomapi**, we know that maps help connect people to each other and to the world around them. That's why we want to make maps better, safer and faster with the world's first decentralized digital mapping network.

By leveraging today's blockchain technology, we are building an updatable map with a partly Open-sourced API. At Gomapi we believe that we can make mapping accesible to everyone from early-stage startups to big corporations. Gomapi won't monetize your data and is built to be cheaper and faster than current solutions.

By joining forces with the community from developers and geo-experts to businesses and public services, we're growing a blockchain solution for digital mapping at an enterprise level.

4YFN

Generalitat de Catalunya
Government of Catalonia

4 Years From Now (4YFN), the leading startup platform in the entrepreneurship and digital innovation field promoted by **Mobile World Capital** and the **GSMA**, presents its 6th edition of its most international event, **4YFN Barcelona 2019**, which will take place within the framework of the GSMA Mobile World Congress between 25-27 February at Pavilion 8 in the Fira de Barcelona at Montjuïc, will gather local and international entrepreneurs, startups and professionals working at large corporations in order to create and launch new tech-based businesses.

4YFN Barcelona 2019 expects to attract **over 20,000 visitors** in an event that will see the participation of **600 investors**. Additionally, the exhibition area will welcome more than **600 startups** from **145 countries** and 12 international delegations from Belgium, Colombia, France, Germany, Israel, Italy, Japan, South Korea, Spain, Sri Lanka, Taiwan and the United Kingdom.

The event programme also includes a total of 110 hours of content on blockchain, IoT, tech transfer, corporate venturing and artificial intelligence, among other items. These sessions will be chaired by **275 leading international speakers**.

On the 28th February, entrepreneurs will have access to the Gran Via congress area so they can take part in the final day of the MWC.

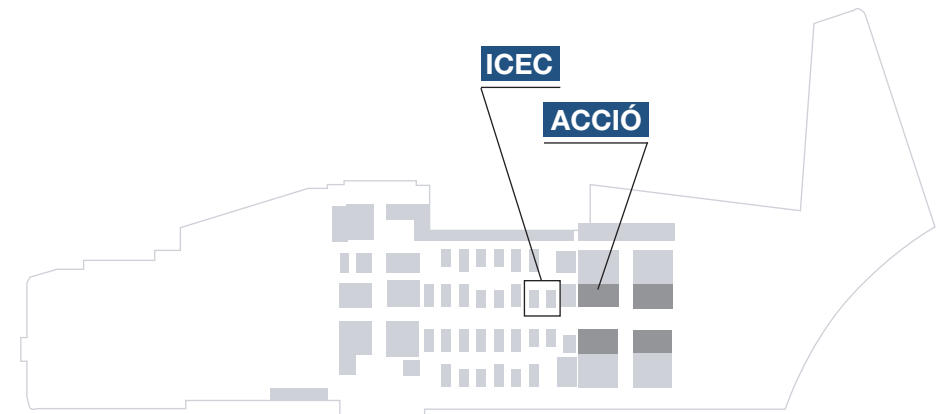

It is aimed at an international public, made up of start-ups, investors and executives from large companies attending the MWC.

The Government of Catalonia is present in the 4YFN with 36 Catalan companies. With this activity, Catalonia positions itself as one of Europe's most recognised, dynamic and promising start-up ecosystems.

Bidle Legal is a Barcelona based start-up that is transforming the way companies manage legal documents. Today, companies are making their legal documents in an expensive and inefficient way. They create their documents either from scratch or by replicating templates - both processes are labour and cost intensive, and allow for human error. Bidle Legal is a software that allows businesses to automate the process of creating their legal documents - eliminating human errors, while saving both time and money. Timings with our solution are shortened from 120 to just 10 minutes and any risks of human errors are mitigated by 95%. Our software automates everything in the process: from creation of the contract, review, shipment, digital signature and storage.

Are you looking for new international partners? Are you looking for new cooperation opportunities? Do you want to commercialize your technology? Come talk to an expert from the Enterprise Europe Network.

Enterprise Europe Network (www.een.ec.europa.eu) is an international network of close to **600 partners from 62 countries** with more than **3,000 local experts** ready to **help you find the right partners and grow your business through innovation.**

Amongst other services, ACCIÓ, the Catalan Agency for Business Competitiveness, **as a member of the network, organizes year after year at the Mobile World Congress** a B2B matchmaking event (Brokerage Event). In this edition, around 400 companies from more than 40 countries have already registered.

- **MWC Brokerage event:**

The MWC Brokerage Event is a great opportunity to:

- Identify potential international partners
- Meet targeted companies and decision-makers
- Complement your visit to the congress with a personalized schedule

When? 26-28 February 2019

Where? Brokerage event area (CS20)

How to register? Sign up in <https://mwc2019.b2match.io/home> before Feb. 12th, it is free of charge!

- **Networking Workshop with Poland, Israel, South Korea, Argentina & Brazil:**

In order to complement the Brokerage event, this edition ACCIÓ organizes a Networking Workshop with 5 key Markets: Poland, Israel, South Korea, Argentina & Brasil.

When? 25th of February 2019

Where? Brokerage event area (CS20)

The workshop will begin with a welcoming breakfast and a presentation of the attractive Catalan innovation ecosystem and the support offered by ACCIÓ to attract foreign investment and International tech cooperation. Afterwards, there will be a session for each region where key agents of the different markets will present the ecosystems, and opportunities for technology transfer and RD. At the end of each session, participants will have the chance to network with these key agents and companies.

Contact us:

www.een.cat

info.een@een.cat

ACCIÓ functions:

- Developing business competitiveness
- Encouraging the internationalisation of Catalan firms, their expansion and consolidation
- Promoting Catalonia as a business-friendly location
- Encouraging R+D and business innovation, as well as technology transfer
- Fomenting the creation of technological and high-growth potential start-ups

To promote internationalization and innovation, ACCIÓ counts on a network of 40 Trade and Investment Offices across the globe based at the main economic cities, operating in more than 100 markets. Our Trade and Investment Offices provide Catalan business qualified support, insight and advice in international trade and investment.

Trade and Investment Offices closely monitor market trends and analyse potential risks. Services provided are tailor-made depending on specific company needs and level of presence in chosen markets, from creating demand to giving support in productive investment and logistics:

- Market research
- Search for marketing channels: distributors, agents, customers, etc.
- Search for supply chains: suppliers, manufacturers, etc.
- Search for trade and technological strategic alliances
- Setting up: business location, legal and labour advice, partnership opportunities, etc.
- Trade missions
- Contact follow-ups and business networking
- Recruitment of qualified staff

Our offices also offer guidance to international firms on opportunities and inward investment to Catalonia.
