- Animal production systems
- Plant and animal health
- Integrated ecological approaches
- Territorial dynamics - rural policies
- Provision of public goods
- Digital revolution
- Thematic networks
- AKIS - On-farm demonstrations

El concepto “multi-actor approach – MAA”

Pag 19 -21 Specific requirements for multi-actor projects:

- **Multi-actor approach** is a form of responsible research and innovation **RRI**,
- Aims to make the **R&I process** and its outcomes more **demand-driven**, reliable and **relevant to society**.
- **More than just widely disseminating the results of a project**, or listening to the views of a board of stakeholders.
- **Genuine and sufficient involvement** of a targeted diversity of **actors, (end-) users of the project results such as** farmers / farmers' groups, foresters / foresters' groups, fishermen / fishermen's groups, advisors, food processors, businesses, consumer associations, local communities, citizens, civil society organisations including NGOs, government representatives, etc.
- **All over the whole course of the project: from participation in project planning and experiments to implementation**, dissemination of results and a possible demonstration phase.
- **Building blocks** for the project proposal are expected to come **from science as well as from practice** and from intermediaries: it is a '**co-creation**' process. **End-users and practitioners are to be involved**, not as a study-object, but to use their practical and local knowledge and/or entrepreneurial skills to develop solutions and create 'co-ownership' of results for (end-) users and practitioners.

La definición del enfoque multiactor

Pag 19-21 - Specific requirements for multi-actor projects:

Therefore, a multi-actor project proposal **must demonstrate**:

- how the **project proposal's objectives** and planning are targeting the **needs/problems** and opportunities of the **(end-)users** of the project results;
- how the description of the project concept and in particular the composition of the consortium reflects a balanced choice of key relevant actors who have **complementary types of knowledge (scientific and practical)**, and will ensure a broad implementation of project results which should be useful in practice;
- how the project intends to **include existing practices** and tacit knowledge in scientific work. This should be illustrated in the project proposal with a sufficient number of **high-quality knowledge exchange activities** indicating the precise and active roles of the different non-scientific actors in the work. Thanks to the **cross-fertilisation of competencies and ideas between actors**, this should generate innovative findings and solutions that are more likely to be applied;
- how the project will facilitate the multi-actor engagement process by making use of the most appropriate methodologies;
- the project's added value: **how the project will complement existing research and best practices**;

- the proposal should demonstrate how the project will **result in practical knowledge**, approaches or tools, made **easily understandable and accessible**, and how this free material for practice will feed into the **existing dissemination channels most consulted by the (end-) users** of the project results in the countries and regions;
- for topics linked to Intervention **Area 3**, for EU-wide communication, this knowledge should also be assembled in a substantial number of '**practice abstracts**' in the **common EIP format** of the European Innovation Partnership (EIP) 'Agricultural Productivity and Sustainability' (**EIP-AGRI**);
- for other topics, this EIP may also be used if they are covered under its innovative areas, as may other similarly effective solutions for dissemination through the main existing dissemination channels targeting (end-)users;
- for topics linked to Intervention **Area 3**, **involvement, as much as possible, of interactive innovation groups operating in the EIP-AGRI context, such as EIP-AGRI Operational Groups funded under Rural Development Programmes.**

The EIP common format for "**practice abstracts**" is available at:

<https://ec.europa.eu/eip/agriculture/en/content/eip-agri-common-format>

4 Formas de incluir a los GO en proyectos MAA y redes temáticas

1. The full **OG can be a partner** (=beneficiary) or 3rd party if it is constituted as a legal entity.
2. One **OG partner**, established as a legal entity is a partner or 3rd party.
3. **Partner from the H2020 project can earmark budget** under “other direct costs” to cover expenses for OG members (e.g: OGs invited to workshops, cross-visits across countries)
4. **Cooperation on a voluntary basis** (no impact on MA project’s budget) Very strong evidence is needed that the OGs will indeed undertake these linking activities (e.g: visible in the OG project plan as approved by rural development authorities, or bilateral agreement as annex to the H2020 proposal).

Operational Groups – Rural Development Programmes

- The EIP implementation via rural development programmes aims at a flexible and open system for the creation of a multiplicity of Operational Groups (OGs)
- 98 MS/regions will be implementing the EIP in their 2014-2020 Rural Development programmes with regular calls for Operational Group projects during this period
- 3200 planned OGs in 2014-2020.

Grupos operativos en la EIP-AGRI

The screenshot shows the EIP-AGRI website interface. At the top, there is a navigation bar with links for 'Legal notice', 'Cookies', 'Contact on Europa', a search bar, and 'My Account'. Below this is a banner image of a group of people in a field with the text 'SHARING KNOWLEDGE - TACKLING CHALLENGES - CONNECTING PEOPLE'. A secondary navigation bar contains links: 'ABOUT', 'EIP-AGRI PROJECTS', 'SHARE', 'FIND', 'EVENTS', 'NEWS', 'PUBLICATIONS', and 'FOCUS GROUPS'. The main content area is titled 'Operational Groups' and includes a paragraph explaining their purpose: 'Operational Groups are intended to bring together multiple actors such as farmers, researchers, advisers, businesses, environmental groups, consumer interest groups or other NGOs to advance innovation in the agricultural and forestry sectors.' Below this, a list of links is provided: 'What is innovation?', 'Concept EIP-AGRI Operational Groups', 'Video: Operational Groups, first experiences', 'Operational Groups database', 'Innovation support services', 'How to evaluate innovation?', 'Contact Managing Authorities', and 'Links to national Operational Group databases'. A left sidebar contains a menu with items like 'About', 'Europe 2020 strategy', 'Funding streams', 'Operational Groups' (highlighted), 'Horizon 2020', 'Multi-actor projects', 'Thematic networks', 'Subgroup on Innovation', 'EIP-AGRI Service Point', and 'EIP-AGRI multiplier toolkit'.

European Commission > EIP-AGRI > About EIP-AGRI > Operational Groups

Operational Groups

Operational Groups are intended to bring together multiple actors such as farmers, researchers, advisers, businesses, environmental groups, consumer interest groups or other NGOs to advance innovation in the agricultural and forestry sectors.
