# Participation of GeoNumerics in Horizon 2020 & success case: the mapKITE project

P. Molina

GeoNumerics  
Av. Carl Friedrich Gauss 11  
Parc Mediterrani de la Tecnologia  
E-08860 Castelldefels (Spain)

# AGENDA

- GeoNumerics:
  - Brief about us
  - Strategy to face participation in Horizon2020
  - Results
- MapKITE
  - Project description
  - Roadmap: from idea to market

**GeoNumerics' primary goal is to develop state-of-the-art geomatic software and deliver outstanding services to the geomatic community.**

- (kinematic) geodesy + (RT & PP) navigation
- remote sensing & (aerial & terrestrial) photogrammetry
- GPS and GPS/INS trajectory determination

INNOVATIVE SME

Valid until Dec 31<sup>st</sup> 2018

*Awarded the “Innovative SME” seal by the Spanish Ministry of Economy and Knowledge (2015-12) for the period 2016-2018.*

## STRATEGY FOR HORIZON 2020: ROLES IN PARTICIPATION

- **Leadership or high involvement** in proposals that are highly-aligned with GeoNumerics' goals.
  - H2020 becomes a “capitalizer” in the direction of GN's R&D strategy
  - Key: proper selection and engagement by partners
  
- **Participation in third-party proposals** in which the contribution is aligned with our capacities.
  - H2020 becomes support tool to on-going GN development
  - Key: engage to successful coordinators

## STRATEGY FOR HORIZON 2020: FEW KEYS ABOUT...

- Proposal writing,
  - **Clear & synthetic** – assume reviewers will have little time for the review...
  - **Technical but focused** – non-technical audience shall understand
  - The **first page** is the page
  - Clear **differentiator** & innovation
  - At the end, **cross-check** against the goals of the call
- Consortium composition,
  - Start **as soon as possible**: partners, definition, overall & specific goals, WPs
  - **The “right” team**: countries, type of partners vs necessary tasks...
  - **Project matches call** – do not make the call match to your project.
  - **Support letters** are crucial
