Generalitat de Catalunya
Government of Catalonia

Twenty Years Connected: Catalonia at MWC 2026

MWC is back, bringing with it the moment each year when the global tech community comes together not only to showcase what's new, but to align on what comes next. In an industry defined by speed, MWC remains the place where companies, institutions, startups, and investors tackle shared challenges, and turn bold ideas into real-world outcomes.

For Catalonia, MWC 2026 carries special significance: it marks the 20th anniversary of the Congress being held here. Over the past two decades, the event and the region have grown side by side. Barcelona has become a global stage for innovation, and Catalonia has strengthened its position as a leading European tech hub; open to the world, connected to international markets, and driven by a strong culture of entrepreneurship and research. This anniversary is more than a celebration; it is an opportunity to reaffirm a shared commitment to progress that is both competitive and responsible, and that translates into shared prosperity.

Since 2006, the Government of Catalonia has accompanied more than 1,000 companies to MWC and 4YFN, helping them increase visibility, expand networks, and open doors to international business and collaboration. Many have gone on to become global benchmarks, contributing to a Catalonia that is more digital, more innovative, and more inclusive.

The Government of Catalonia sees MWC as a strategic driver of the region's transformation. We work to connect Catalonia's digital ecosystem with global opportunities, support business growth, attract investment, and build partnerships that help innovation scale. We also know that sustainable digital leadership depends on fundamentals: world-class talent, top-notch infrastructure, research excellence and technological capability, and a public sector that can modernize with speed, trust, and impact. Catalonia brings these strengths together in a single ecosystem.

Within the MWC ecosystem, 4YFN has become a key meeting point for startups, investors, and corporations, designed to accelerate new ventures through connections, visibility, and access to investment opportunities. Startups are not a side story of technological change; they are often where the next wave begins, shaping the solutions that will define the future. Catalonia's dynamic startup community reflects that spirit, turning talent and innovation into new companies with global ambition.

This catalog brings together the 44 companies, technology centers, and initiatives you will find at the Catalonia Pavilion at MWC, as well as the 36 startups featured at the Catalonia stand that 4YFN and the 16 startups at the Catalonia Health Innovation Pavilion. It also highlights 44 companies taking part in ACCIÓ's Open Innovation Challenge, launching real-world challenges to kick-start collaboration and projects in areas such as artificial intelligence, big data, the Internet of Things, mobility, and robotics.

We invite you to explore their work, meet the people behind the projects, and discover how Catalonia can partner with you—at MWC 2026 and beyond.

The Right Honourable Mr. Salvador Illa i Roca

President of the Government of Catalonia

MWVC 2026 COMPANIES

Mondrian integrates tools, apps and workspace elements to maximise productivity and performance. With Mirò, users remotely manage Mondrian systems. MoMa unifies information distribution in settings, while Hilma automates complex processes, responding to events and executing actions on Mondrian devices. Together, they form an ecosystem simplifying technical management and optimising environments

ARIAGE develops advanced technological solutions that boost productivity, efficiency and management in environments where people interact with multiple information sources. Combining ergonomics, engineering and proprietary software, it creates intuitive, secure, high-performance platforms adaptable to complex, demanding workflows. These systems streamline decision-making, reduce cognitive load and integrate seamlessly daily operations.

Products/Services/Solutions

We deliver proven biometric, identity and traceability solutions, designed for complex operational environments, while expanding new business for ports and maritime projects.

Our experience spans multiple operational environments, including ports, airports and border control scenarios. Key solutions showcased at MWC include SCAPE, a maritime access and identity control system for boats, and EUROPORT SmartFlow, designed for intelligent vehicle and passenger flow management integrated with Entry/Exit System (EES) requirements.

These solutions reflect our ability to adapt advanced technologies to complex, real-world operational needs.

BIOIDENTI-CELL specialises in advanced biometric, identity and traceability solutions, including systems designed to operate in motion and in dynamic environments, covering the full lifecycle from design and development to deployment and operation.

With over 35 years of experience and strong in-house R&D capabilities, we work closely with customers and partners using Scrum-based methodologies, ensuring flexible, efficient collaboration and the delivery of secure, scalable solutions aligned with real operational needs.

IQU offers a private AI based 5G/6G platform for 5G-Ready applications (e.g., related to AR/VR, industry 4.0, etc.) as well as to customers seeking private 5G/6G agentic networks and intent-driven LLM based deployments. MWC will allow us to demonstrate our platforms' capabilities to potential business customers. The results of the 6G-BRICKS GA 101096954 project will be demonstrated.

Iquadrat, based in Barcelona, provides ICT services since 1997.

Multidisciplinary team: Telecom engineers, programmers, designers, marketing and communication consultants

R&D Department since 2008: 10 Senior researchers (PhD holders), 14 research engineers, 2 R&D admins

Iquadrat offers innovative and customisable platforms that integrate cutting-edge telecommunications and networking technologies for a wide portfolio of emerging applications (Smart homes/cities, energy management, industrial applications, sustainable mobility etc.)

We turn data into growth across marketing, operations and sales. Our services span cookieless analytics, scalable data platforms and market intelligence, plus end-to-end measurement for web, CRM, ERP and campaigns. We build AI-driven automation, predictive models and pricing systems that save time, strengthen decision-making and maximise ROI.

We are a Barcelona-based, data-driven marketing agency with 16 years' experience specialising in analytics, AI and performance marketing. We use data, business intelligence (BI), attribution and automation to help companies grow, acquire users, increase revenue and optimise media investment, connecting marketing decisions to business impact.

We build high-impact AI for telcos, tech companies and smart industries. From Agentic AI systems and scalable data platforms to real-time forecasting and automation, we deliver production-ready solutions fast.

Our approach goes beyond traditional AI models. We design and deploy autonomous AI agents capable of reasoning, planning and executing complex workflows end-to-end — securely integrated into enterprise systems and governed by clear business objectives.

At the core of our approach is Matix: our proprietary AI orchestration and intelligence framework.

We are a team of passionate AI experts with a clear purpose: to solve high-impact business challenges through the responsible and ethical use of data, technology and artificial intelligence. We combine deep technical mastery with a pragmatic mindset, turning knowledge into real value—fast, reliable and aligned with what organisations truly need.

We deliver turnkey CO₂ capture and purification plants and license our modular technology powered by a patented high-performance adsorbent. Our systems treat any gas stream and produce 99.9% pure CO₂ at industry-leading low operating costs—ideal for agrofood, biogas and industrial emitters seeking affordable decarbonisation and circular CO₂ reuse.

Orchestra Scientific develops advanced CO₂ capture and purification technology that captures CO₂ from any gas stream—fermentation, flue gas or biogas—and transforms it into high-value, reusable CO₂. Our modular, non-toxic and cost-efficient solution enables decarbonisation even for small and medium-scale industries at an unbeatable cost.

CS210-CS220 - “Congress Square”

Congress Square – CS210-CS220

Booth A

CATALONIA AI 2030

politiquesdigitals.gencat.cat/ca/economia/ia

Catalonia **AI 2030 Strategy** positions artificial intelligence as a strategic driver of economic transformation, public service innovation and technological sovereignty. It aims to strengthen a robust AI ecosystem—connecting research centers, startups, corporations and public administrations—while accelerating the adoption of trustworthy, human-centric AI across key sectors such as health, industry, mobility and climate. The strategy promotes talent development, international positioning and responsible governance, ensuring that AI developed and deployed in Catalonia is ethical, secure and aligned with European values, contributing to Europe’s digital leadership in a rapidly evolving global landscape.

Booth B

DIGITAL CATALONIA ALLIANCE (DCA)

dca.cat

The **Digital Catalonia Alliance (DCA)** has over 740 tech members, mainly startups and SMEs. The DCA is Catalonia’s tech offer. The DCA helps promote the digital ecosystem in Catalonia, and its synergies with other actors, such as Technology centers, public institutions and their interaction with key sectors like industry, mobility, utilities, and health.

It is organised in seven tech communities: AI, Space, Cybersecurity, Drones, IoT, Blockchain and GovTech.

Congress Square – CS210-CS220

Booth C

CATALONIA SPACE 2030

politiquesdigitals.gencat.cat/ca/economia/espai

Catalonia Space 2030 is the Government of Catalonia's flagship strategy to becoming a leading player in the European space economy. In collaboration with a dynamic ecosystem of innovative companies, research centres, universities and startups, the strategy accelerates innovation, strengthens industrial capabilities, and drives the use of satellite-based services across key sectors.

Through initiatives such as the Space Factory, Catalonia Space Valley, Catalonia Observes and new Earth Observation and Communications missions, Catalonia is building a competitive, sustainable and globally connected space hub. Aligned with Europe's priorities in technological sovereignty and climate resilience, Catalonia Space 2030 turns space technology into real impact for citizens, industry, and the planet.

Catalonia keeps looking up.

Booth D

IGUALTAT EN EL MÓN DIGITAL

The **Department of Equality and Feminism** supports companies and organizations in creating fairer and more equitable working environments. It offers advisory services, training and resources to develop and implement equality plans, introduce measures that guarantee equity, promote work–life balance and address existing inequalities. It also drives initiatives that broaden the educational and professional pathways of girls and young women, helps facilitate career transitions and enhance women’s access to quality employment.

igualtat.gencat.cat/recursosigualtat

The **Department of Business and Labour** promotes the DonaTIC programme within the framework of the National Pact for Digital Talent in Catalonia, with the aim of balancing the supply and demand of digital talent and reducing the gender gap in the digital sphere. This programme supports initiatives that encourage women’s participation in digital professions, highlight and recognize female role models, foster women-led digital entrepreneurship and expand the offer of specialized digital training.

Business Type: B2B2C | **Sector/Technology:** Hospitality, Retail & Education / AI | **Company Stage:** Growth&Scale | **Employees:** 21
Funding Round: -

Software

Protecting digital reputations through AI-powered legal technology and automation

RepScan is a leading legaltech scaling globally with a 96% success rate in digital reputation protection. Our AI-driven SaaS platform automates the detection and unlimited removal of harmful content and reviews. Combining proprietary technology with legal rigor, we offer high-margin, scalable solutions for enterprises, SMEs, and social impact.

SHINEPHI

shinephi.tech

Business Type: B2B | **Sector/Technology:** Semiconductor & Photonics/ Metrology & AI
Company Stage: Seed Stage | **Employees:** 4
Funding Round: 3M

Hardware / Software

High-speed, sub-nanometer optical metrology for zero-defect nanofabrication.

We enable non-destructive highly-stable inspection for zero-defect manufacturing in semiconductor and photonics industries. With our patented technology, our add-on module transforms current imaging systems into high-precision tools, delivering sub-nanometer vertical sensitivity in real time.

	<p>TECHWICH techwich.net</p>	<p>Business Type: B2B, B2C, B2B2C Sector/Technology: EdTech & HRTech / AI Company Stage: Seed Stage Employees: 9 Funding Round: -</p> <p><i>Hardware / Software</i></p>
<p><i>Personalized learning, powered by AI</i></p>	<p>Techwich is an AI-powered learning platform that personalizes education by combining multi-source data—learner signals (goals, skills, pace, preferences), behavioral and performance data, and contextual/environmental data—and, where available and consented, health-related signals that can impact learning. This fusion enables adaptive content, smarter recommendations, and measurable progress for individuals and organizations.</p>	
	<p>TRUE DATA LABS truedatalabs.com</p>	<p>Business Type: B2B Sector/Technology: FinTech, Real State, GovTech / Data Verification Company Stage: Pre-Seed Employees: 5 Funding Round: 300,000</p> <p><i>Software</i></p>
<p><i>Certify all user data on internet instantly</i></p>	<p>TrueData enables tamper-resistant user data verification directly from original online sources in under 30 seconds, without integrations. Using HTTPS, it delivers GDPR-compliant, minimal-data proofs for identity, income, purchases, and interactions. Products include TrueMe for fintech, real estate, govtech, and TrueSocial for court-ready messaging and social media evidence.</p>	
	<p>TTDO ttdo.tech</p>	<p>Business Type: B2B Sector/Technology: Textil / 5G, Blockchain Company Stage: Pre-Seed Employees: 2 Funding Round: 400,000</p> <p><i>Hardware / Software</i></p>
<p><i>Smart Clothing for Smart Businesses</i></p>	<p>Smart Clothing solution that integrates miniaturized electronics, 5G connectivity, and blockchain technology to enable interaction between workers and the industrial environment. It delivers predictive alerts for machine downtimes and safety risks without compromising user comfort or workflow. TTDo boosts operational efficiency, reduces workplace accidents, and empowers people through digital transformation.</p>	
	<p>VERICTA vericta.com</p>	<p>Business Type: B2B Sector/Technology: Media / AI Company Stage: Seed Stage Employees: 8 Funding Round: 100,000</p> <p><i>Software</i></p>
<p><i>Protect your company from fake media</i></p>	<p>Vericta is an AI-powered media intelligence platform that detects AI-generated and manipulated images, video, and audio. Through a scalable, developer-friendly API, it supports fraud prevention, identity verification, insurance claims, and compliance. Vericta helps enterprises mitigate risk, protect trust, and adapt to the rapidly evolving generative AI landscape.</p>

VOLUM TECH
volum.tech

Business Type: B2B | **Sector/Technology:** Healthcare, Education & Hospitality / XR
Company Stage: Seed Stage | **Employees:** 3
Funding Round: 500,000

Hardware / Software

Real-time holoportation

Volum Technologies is a deep-tech company specializing in real-time holoportation and immersive 3D communication. Officially launched in July 2025, Volum focuses on democratizing holographic telepresence by making high-quality, real-time 3D capture accessible using standard commercial cameras.

WAIIS
waiis.eco

Business Type: B2B, B2C, B2B2C | **Sector/Technology:** Smart City / Mobility | **Company Stage:** Early Growth | **Employees:** 10
Funding Round: 2M

Software

Think data, move better

We connect people and commutes through our GeoAI.

WATLAS
watlas.eu

Business Type: B2B, B2C | **Sector/Technology:** Circular Economy, Logistics & Sustainability / AI | **Company Stage:** Early Growth | **Employees:** 4 | **Funding Round:** Bootstrapped

Hardware / Software

*Stop wasting.
Start composting*

WAtlas provides intelligent urban biowaste management through Compost as a Service. We combine low-emission logistics, end-to-end traceability and proprietary software to transform food waste into premium, locally produced compost, reducing landfill dependency while regenerating depleted soils.

WIPASS
wipass.ai

Business Type: B2B | **Sector/Technology:** Hospitality & Retail / AI | **Company Stage:** Seed Stage | **Employees:** 9 | **Funding Round:** 2.5M

Hardware / Software

*One touch.
Endless connections*

Personalised communication with guests, together with full integration of the digital ecosystem with which they interact during their stay, can have a very positive impact on the hotelier's objectives, both in terms of revenue and operations.

	<p>ABCDX abcdx.ch</p>	<p>Business Type: B2B Sector/Technology: Diagnostics Company Stage: Pilot/Clinical/Regulatory Employees: 6 Raised Investment (M€): 21</p>
<p><i>First digital, mobile biomarker-based diagnostic solution</i></p>	<p>ABCDx revolutionizes emergency brain diagnostics by combining proprietary biomarkers with artificial intelligence, delivering rapid, accurate, and accessible pre-hospital detection of large vessel occlusion (LVO) strokes.</p>	
	<p>AIMA BEYOND ARTIFICIAL INTELLIGENCE aima.chat</p>	<p>Business Type: B2B SaaS Sector/Technology: Digital Health Company Stage: Development/Prototype Employees: 8 Raised Investment (M€): 2,75</p>
<p><i>Healthier, safer and happier aging with empathic Ai</i></p>	<p>AiMA Beyond AI is a startup that develops empathetic virtual assistants to improve care for elderly people with chronic conditions or experiencing unwanted loneliness.</p>	
	<p>ALLPRIV allpriv.com</p>	<p>Business Type: - Sector/Technology: Supplier & Engineering Company Stage: - Employees: 7 Raised Investment (M€): 0,36</p>
<p><i>Cybersecurity for Medical Devices</i></p>	<p>At Allpriv, we are manufacturers of an HSM (Hardware Security Module) managed by AI agents on blockchain. The main application is the protection of medical devices for hospitals, helping manufacturers integrate our modules and comply with the new regulatory requirements.</p>	
	<p>ARKEOBOTS arkeobots.com</p>	<p>Business Type: B2B Sector/Technology: Digital Health Company Stage: - Employees: 3 Raised Investment (M€): -</p>
<p><i>For a world where aging is smiled upon</i></p>	<p>Arkeobots is a technology company that develops artificial intelligence-enabled social robot companions aimed at supporting older adults by providing interaction, emotional engagement, and connection with families and caregivers. Its flagship project, the humanoid robot Arkeo, is designed to converse naturally, recognize emotions, suggest activities, offer reminders, and facilitate communication to help reduce loneliness and enhance well-being among seniors.</p>	

#4YFN26

	<p>BETTSO CORPORATION bettso.es</p>	<p>Business Type: - Sector/Technology: Digital Health Company Stage: Pilot/Clinical/Regulatory Employees: 2 Raised Investment (M€): -</p>
<p><i>Immersive audio for therapeutic patient experiences</i></p>	<p>Betto is a healthtech platform delivering therapeutic audio content, based on applied neuroscience and binaural (3D) sound, designed to modulate the autonomic nervous system in clinical settings. It supports emotional regulation, reduces anxiety, and enhances therapeutic processes through a non-pharmacological, scalable solution that can be integrated into healthcare protocols.</p>	
	<p>CHEMOTARGETS chemotargets.com</p>	<p>Business Type: B2C and B2B2C Sector/Technology: R&D Services Company Stage: On the market Employees: 31 Raised Investment (M€): 0,48</p>
<p><i>Generative Design of Precision Drugs</i></p>	<p>Chemotargets SL offers validated and cutting-edge computational methodologies with top market predictive performance. The innovation strategy of the company is driven by new methods generated at Dr. Mestres' lab. Chemotargets helps the biopharma industry in the process of bringing new medicines to market, speeding up drug discovery and development, and improving cost-efficiency and safety.</p>	
	<p>COTINCLUSIVA micoti.es</p>	<p>Business Type: B2B Sector/Technology: Digital Health Company Stage: Pilot/Clinical/Regulatory Employees: 6 Raised Investment (M€): 0,01</p>
<p><i>COTI connects senior with their families and healthcare professionals</i></p>	<p>COTI is a digital platform developed by COTINCLUSIVA SL that facilitates communication between elderly and dependent individuals and their families and social care professionals.</p>	
	<p>DEBIOS DIAGNOSTICS debiosdx.com</p>	<p>Business Type: B2B Sector/Technology: Diagnostics Company Stage: Pilot/Clinical/Regulatory Employees: 6 Raised Investment (M€): 18</p>
<p><i>Redefining kidney care with non-invasive diagnostics</i></p>	<p>Debios is developing the first urine test for the detection of renal fibrosis, enabling early diagnosis of chronic kidney disease and improved non-invasive patient monitoring, supporting more effective and personalized care.</p>	

#4YFN26

	<p>FLOMICS BIOTECH flomics.com</p>	<p>Business Type: B2B Sector/Technology: R&D Services Company Stage: On the market Employees: 20 Raised Investment (M€): 54</p>
<p><i>Blood test for multi-cancer early detection using AI and RNA biomarkers</i></p>	<p>Flomics Biotech is a pioneering startup with the aim of translating cutting-edge research in circulating free RNA (cfRNA) into the development of a powerful liquid biopsy technology for the early detection of multiple cancer types in a minimally invasive way from a single blood sample, even at Stage I.</p>	
	<p>HEALTHTECH INNOVATIONS healthtechinnovations.es</p>	<p>Business Type: B2B Sector/Technology: Medical Technology Company Stage: On the market Employees: 11 Raised Investment (M€): 2</p>
<p><i>Elevating medical care through surgical intelligence</i></p>	<p>Healthtech Innovations is a Deep Tech spin-off developing artificial intelligence and robotics solutions for the operating room and hospital sterilization units. Our technology enhances patient safety and optimizes surgical nursing workflows.</p>	
	<p>LOGMEAL / AIGECKO TECHNOLOGIES logmeal.com</p>	<p>Business Type: SaaS B2B and B2B2C Sector/Technology: Digital Health Company Stage: On the market Employees: 4 Raised Investment (M€): 0,51</p>
<p><i>From Food Images to Clinical Insights</i></p>	<p>LogMeal is a digital solution for automatic food recognition and nutritional estimation from a single image. We use AI and computer vision to transform the way healthcare professionals monitor patients' dietary intake.</p>	
	<p>LUMIRIS SPECTRAL SOLUTIONS lumiris.tech</p>	<p>Business Type: B2B Sector/Technology: Medical Technology Company Stage: Development/Prototype Employees: 6 Raised Investment (M€): 15,83</p>
<p><i>Detecting the signals of life</i></p>	<p>Lumiris Spectral Solutions S.L. has developed a medical device that will provide assisted reproduction specialists with an essential tool to select the best embryo, helping future parents achieve pregnancy more quickly while reducing the number of unsuccessful treatments. Lumiris' patented METAPHOR technology combines hyperspectral imaging and artificial intelligence to assess embryonic metabolism in a safe and non-invasive manner.</p>	

#4YFN26

	<p>MIMARK DIAGNOSTICS mimark.es</p>	<p>Business Type: B2B Sector/Technology: Diagnostics Company Stage: Development/Prototype Employees: 17 Raised Investment (M€): 75,21</p>
<p><i>Transforming diagnosis through gynecological fluids</i></p>	<p>MiMARK is a Catalan women's health startup founded and led by women, aiming to turn gynecological fluid into the new standard liquid biopsy for gynecological diagnosis. Established in 2021, we won the EIT Health Wild Card (€15M) and have secured nearly €7M in competitive funding — including the EIC Accelerator — in addition to almost €3M in private investment.</p>	
	<p>POLAR NANOPHARMA polarnanopharma.com</p>	<p>Business Type: B2B Sector/Technology: Therapeutics Company Stage: Preclinical Employees: 3 Raised Investment (M€): 1,02</p>
<p><i>Safer Nanomedicine for Oncology. Advanced polymer nanoparticle platform for controlled drug delivery.</i></p>	<p>At Polar NanoPharma, we develop controlled-release nanomedicines designed to minimize the systemic toxicity of oncology drugs. Lower toxicity enables better therapies, improved patient safety, and reduced development risk.</p>	
<p>ROBOPEDICS</p>	<p>ROBOPEDICS robopedics.com</p>	<p>Business Type: - Sector/Technology: Medical Technology Company Stage: Pilot/Clinical/Regulatory Employees: 3 Raised Investment (M€): 1,36</p>
<p><i>The first robotic solution engineered to help stroke survivors to walk at home</i></p>	<p>The first robotic gait assistance device specifically designed for the millions of stroke survivors who have lost mobility.</p>	
	<p>SYNKOTECH synkotechbio.com</p>	<p>Business Type: - Sector/Technology: R&D Services Company Stage: On the market Employees: 11 Raised Investment (M€): -</p>
<p><i>Shaping the Future of Biocompatible Skin Protection & Wound Closure</i></p>	<p>Synkotech is a biotechnology company focused on developing biocompatible solutions for wound suturing and skin healing. The company integrates expertise from fields such as chemistry, chemical engineering, biomedicine, and regulatory affairs, offering consultancy services in research, ISO compliance, and analytical testing. Additionally, Synkotech provides contract manufacturing organization (CDMO) services, supporting the development and scaling of production operations for clients.</p>	

Open Innovation Challenge

#MWC26

*Where global challenges
meet innovation*

ACCIÓ

#MWC26

#OpenInnovationChallenge

in collaboration with

MWC Open Innovation Challenge 2026

The MWC Open Innovation Challenge returns to MWC and 4YFN 2026.

MWC Open Innovation Challenge 2026 is the premier B2B matchmaking event at MWC, connecting corporations with open innovation challenges and corporate venture projects with start-ups, technology providers, and solution developers.

Corporations and investors benefit from personalized support provided by our team using ACCIÓ's methodology, which includes:

- Identifying and refining challenges
- Tailor-made scouting to find relevant partners aligned with their interests
- A curated meeting agenda with selected solution providers

We've created a dedicated platform where corporates can register, publish their challenges, and schedule meetings with technology suppliers — including start-ups, innovative SMEs, R&D institutions, and universities — from around the world.

Technology providers with solutions that can address these challenges are invited to register for the event and upload details about the technologies and services they offer.

Participation gives you the chance to connect with the most disruptive solutions and is a great opportunity to:

- Identify potential international partners
- Meet targeted companies and decision-makers
- Complement your visit to the congress with a personalized agenda of meetings

#MWC26

When?

- 2nd to 5th of March 2026 (dates dedicated exclusively to physical meetings)
- 9th to 13th of March (dates dedicated exclusively to online meetings)

Where?

Physical meetings will take place inside Fira Gran Via, at Catalonia's Pavilion in the 4YFN Hall at MWC. Exclusive for corporations and investors; start-ups and tech providers with previously arranged meetings with them. **Virtual meetings** will be held using the videoconferencing tool of the event's platform: <https://www.b2match.com/e/mwc-open-innovation-challenge-2026/components/59704> — it is free of charge.

We will provide a free pass to 4YFN if you have at least one physical meeting.

The MWC Open Innovation Challenge is hosted by ACCIÓ (Catalonia Trade & Investment agency) and Enterprise Europe Network.

Contact us:

<https://catalonia.com/services-for-investors/open-innovation-challenge-service>
inint.accio@gencat.cat
+34 934 767 200

Reach your business goals by joining us at the MWC OPEN INNOVATION CHALLENGE!

Open for start-ups and tech providers from January 14th, 2026.

From 2nd to 5th of March, physical meetings between corporates/investors and technology providers will take place at the MWC/4YFN venue in Barcelona.

Other meetings will be online on separate days between **March 9th and 13th.**

ACCIÓ: Driving your company's growth and expansion

ACCIÓ, the public agency of the Government of Catalonia, is the traveling companion your company needs for it to expand through **innovation**, **international growth** and **business strategy**.

Did you know that ACCIÓ serves 37,500 Catalan companies and entities each year?

All of them seek support to undertake R&D or technological transformation projects, implement new international growth processes or revamp their business models.

Would you like to follow in their footsteps? **We'll accompany you!**

We can help you make your projects come true!

Green and technological transformation

Access innovation and advanced digital technologies.

International growth

Drive your company towards new horizons.

Business strategy

Develop a new business plan.

With 40 offices worldwide, the agency is also responsible for attracting **foreign investment** to Catalonia, contributing to the **positive impact** of the Catalan companies in the region and searching for and providing **new business opportunities**.

If you haven't done so already, **promote your company with ACCIÓ!**

Visit accio.gencat.cat and find out how we can help you!

Barcelona-Catalonia: Southern Europe's Hub for Business and Life

The best FDI region in Europe
Home to 9,600+ global companies—a prime spot for innovation and growth.

A tradition of industry, driven by technology
Where industrial heritage meets cutting-edge innovation.

Exceptional talent at your fingertips
Skilled professionals and a dynamic business ecosystem.

Unmatched quality of life
Top services, great connectivity, and a vibrant culture.

Catalonia Trade & Investment: your partner for success

We are your trusted partner for expanding in Barcelona-Catalonia. As the Catalan Government's agency for foreign investment attraction, we bring over 35 years of expertise in helping businesses succeed.

Our free, tailored, and confidential services include:

Business location: Finding the perfect site for your company.

Set-up assistance: Facilitating a smooth start for your operations.

Financing and incentives: Guiding you through funding opportunities.

International mobility: Supporting executive relocation and talent search.

Local partners: Connecting you to key suppliers and tech providers.

Discover why global companies choose Barcelona-Catalonia.

Let us help you thrive.

Generalitat de Catalunya
Government of Catalonia
