WEBSITE/ www.captio.net

CONTACT/ Joel Vicient | +34 669 481 577
jvicient@captio.net

Captio converts annoying expense receipts into data that your company can use to save money.

You need to travel for business and travelling means spending. Captio lets you use your smartphone to capture your receipts wherever you are. Automatically extract the important data and store it so it can be analysed and expense reports can be generated. These reports can be sent directly for approval, thus centralizing the whole process in one environment.

Capture, classify, share. Captio revolutionizes the way you manage the registration and validation of expenses.

Our team of 200 engineers has deep skills on HW, SW, Mech. and Validation. Several M2M developments including technologies and protocols like 3G, LTE, GPS, Galileo, GLONASS, CAN, Ethernet, USB, Android, Apple Apps., etc. makes us experts on communications and very successful transforming dreams to reality thanks to our large experience and commitment with our customers.

COMPANY/ InQbarna Kenkyuu JO S.L.

ADDRESS/ Pellaires 30-38 | 08019 Barcelona

WEBSITE/ www.inqbarna.com

CONTACT/ Nacho Sánchez | +34 607 515 045
nacho.sanchez@inqbarna.com

InQbarna is a Barcelona-based start-up specializing in multimedia mobile applications, with image, video and music processing as its main assets. TunerTool and deeJ are our best-known apps, with more than 1M downloads combined.

In 2012, we have developed apps such as LextTalk (language exchange) and Riffer (the first music social network) to complement our catalogue with new features and mobile experiences.

We have collaborated with companies such as LabTrip (customized travel guides), Sa-noen (books and apps for kids) and Seven4Seven (single-player game for FC Barcelona) to bring great apps to the mobile arena.

COMPANY/ iSOCO

ADDRESS/ Av. Torre Blanca 56 (ESADE Creápolis) | 08172 St Cugat del Vallès

WEBSITE/ www.isoco.com

CONTACT/ Sergi Mesquida | +34 678 774 759
ecastells@isoco.com

iSoco was founded by five researchers in 1999 as a spin-off of the Artificial Intelligence Research Institute (IIIA), which forms part of the Spanish National Research Council (CSIC).

We build collaborative networks that enable our clients to create added value in their relationships with clients, providers and partners, and redesign Internet-based processes and incorporate technology based on artificial intelligence and semantic technology.

We focus on transforming our customer's investments into economic value: cost reductions, efficiency, increased sales, innovation in products and services and market knowledge working to meet the changing needs that the Internet has generated in the way business is done since its inception.

In 2006, we created our R&D centre, iSOCOlab, located in Madrid, and we now have a team of twenty researchers.

COMPANY/ Joinup Green Intelligence

ADDRESS/ Sant Joan de la Salle, 42 | 08022 Barcelona

WEBSITE/ www.joinuptaxi.com

CONTACT/ Alberto López | +34 646 203 616
alberto@joinup.es

JoinUp Taxi is a community that uses applications for smartphones to provide a meeting point for people with the same mobility needs, as well as a fast and focused contact service that enables them to make the most of the benefits of group consumption and reduce their daily expenses.

Our first service is JoinUp Taxi, the first taxi-sharing app. It is very easy to use, intuitive and free of charge for the user. It also has the original feature of enabling bookings up to one week in advance. Moreover, it includes a meter to calculate economic and CO₂ savings.

COMPANY/ Lona Systems Technologies

ADDRESS/ Balmes 262, 5è 1a i 2a | 08006 Barcelona

WEBSITE/ www.lonasystems.com

CONTACT/ Pau Blasi | +34 933 680 379
pau.blasi@lonasystems.com

Lona Systems Technologies provides mass communication solutions for companies using mobile technologies to reach any terminal, including basic models and the latest smartphones to maximize the value of two-way communications.

Fast and effective communication between any company and its end customers is crucial in today's business. Yet the market is poorly served by traditional means that are not adjusted to fast technological growth now and in the future. That's why we see clear room for improvement through mobile services and the wise use of solutions, including the most powerful apps and traditional SMS in an integrated way.

COMPANY/ Magazapp

ADDRESS/ Segle XX 93 | 08032 Barcelona

WEBSITE/ www.magazapp.com

CONTACT/ Pere Sanz | +34 902 955 324

oscar.escudero@slashmobility.com

SlashMobility is a startup that focuses on mobile technologies for the iPhone, Android, Blackberry and Windows Phone. Our mission is to be the best specialist on the Catalan and Spanish markets for providing mobile applications. We have our own line of products and a team that develops customized projects and training services for businesses and professionals. The Slashmobility team developed 100 apps last year and trained 500 students in mobile technologies. Our biggest asset is our expertise in mobile technologies. In 2012, we set up Slash Lab, our R&D Department, to help entrepreneurs develop their projects in the mobile sector.

COMPANY/ TwoNav

ADDRESS/ Draper 13 | 08350 Arenys de Mar (Barcelona)

WEBSITE/ www.compegps.com

CONTACT/ Santiago Twose | +34 933 968 068
stwose@compegps.com

CompeGPS Team, located in Arenys de Mar (Barcelona), has been developing software for digital map viewing and GPS navigation since 2001. We create applications for outdoor trip management (hiking, mountain biking, 4x4, paragliding, hang gliding, etc.) for PC, Mac, PDA and smartphones. The programs are supplemented by a comprehensive catalogue of topographic maps from around the world and accessories.

Moreover, our **TwoNav** software provides all the functions of typical road navigators as well as traditional off-road capabilities. The product is marketed as software (pocket PC, smartphones, PC/UMPC/tabletPC) for different platforms (Android/iPhone/Windows Mobile) and as our high-end outdoor GPS hardware (TwoNav Aventura, TwoNav Sportiva, TwoNav Sportiva+, TwoNav Delta and TwoNav Ultra).

COMPANY/ Ubiqua

ADDRESS/ Balmes 152, Planta 9 | 08008 Barcelona

WEBSITE/ www.ubiqua.es

CONTACT/ Jordi Serra | +34 933 182 307
jordi@ubiqua.es

Founded in 2005 in Barcelona, **Ubiqua** specializes in developing mobile content (apps and web apps) and our own platforms for mobile marketing operations.

Ubiqua is presenting two products at MWC'13:

- ▶ TheSharingCode: App for Android and iOS Web. With this app, users can create and read QR, while automatically creating and managing their own social network app.
- ▶ IP + GSM integrated messaging platform: Through this platform, developers can use simple APIs to integrate their GSM or IP messaging needs and divert traffic depending on the availability of their app on the recipient's device.

COMPANY/ Urbiotica

ADDRESS/ Jordi Girona 1-3, Edifici K2M | 08034 Barcelona

WEBSITE/ www.urbiotica.com

CONTACT/ Irene Compte | +34 934 054 652
irene.compte@urbiotica.com

The solutions developed by **Urbiotica**[®] are specifically designed to be harmoniously integrated in the existing environment. Sensors and communication devices that are robust, vandal-proof, consume very little power (minimum life span: 8 years) and have a very low visual impact. Software platforms for data management in the cloud that are modular and adaptable to each customer.

Our objective is to significantly contribute to the development of the City Operating System[®], which will provide the city with a new intelligence capable of coordinating and interconnecting all elements in what is already known as the Internet of Things.

COMPANY/ Verasat Global

ADDRESS/ Aribau 168, 1r 1a | 08036 Barcelona

WEBSITE/ www.verasatglobal.com

CONTACT/ Eduard Cortès | +34 931 000 076

WEBSITE/ www.wesmartpark.com

CONTACT/ Jaume Mayor | +34 615 958 121
jmayor@wesmartpark.com

Wesmartpark's mission is to create business projects by applying new technologies to achieve maximum efficiency with existing resources. Our goal is to make life easier and more sustainable for people and society.

9Smart's first project is WeSmartPark, a patented system that applies new technologies to solve the difficulty of finding a place to park in cities. The project achieves this by providing access to any private parking space through individual management and without the exchange of keys. In this way, we can make better use of existing spaces without building new ones and create the biggest low-cost smartparking network with private parking spaces.

COMPANY/ Yuilop

ADDRESS/ Paris 207, 3r 1a | 08008 Barcelona

WEBSITE/ www.yuilop.com

CONTACT/ Antonio Gomez | +34 936 761 378
antonio@yuilop.com

Yuilop is more than an app – it's a 100% free mobile social communication service that connects you to friends and family for real-time multimedia chat and voice calls – all completely free and unlimited (app-to-app). Additionally, users can make calls to landline and mobile telephone numbers and can send traditional text messages (SMS) to any phone worldwide. Yuilop requires a working Internet connection via 3G or Wi-Fi. The app is currently available for iOS and Android devices in twenty countries and is customized for the local language. For example, in Spain Yuilop is available in Spanish and Catalan.

Citilab is the first European citizen laboratory. It has become a leader in the emerging knowledge society. Today it is member of the European Network of Living Labs (EnoLL) and works as a social and technological innovation centre that creates value, knowledge and networking opportunities with all society agents.

The principles of innovating with users in their own environment and working by project and by network have led Citilab to develop its own methodologies and approaches so that people can learn how to develop their own innovative initiatives. In the mobile Internet field, Citilab has developed projects with young people using smartphones to stream live events in real time and to produce their own mobile content. Citilab is promoting a smart city project that develops a framework to promote mobile applications of public interest using city infrastructure by small and medium-sized enterprises.

WEBSITE/ www.asks.cat

CONTACT/ Miquel Montaner | +34 664 221 691 | miquel@isac.cat

ASKS is a research project that aims to lay the foundations for a new way of searching for information: automatic social search. Social searches are not a new concept. In fact, the traditional way to seek information has always been social, i.e. by directly asking friends and acquaintances. In this way, we get only a few answers, but all are valuable, since they were given by a trusted person. The aim of ASKS is to leverage new technologies, social networks and artificial intelligence to automate these types of searches as much as possible and minimize the time it takes to get an answer.

CAT.T2

COMPANY/ CAT.T2

ADDRESS/ Sant Joan de La Salle 42 | 08022 Barcelona

WEBSITE/ www.cat-t2.org

CONTACT/ Gabriel Fernàndez i Ubierno | +34 932 902 428
g.fernandez@dualstream.tu

CAT.T2 is a collaborative project funded by ACCIO and ERDF in which the companies Abertis Telecom, Mier Comunicaciones, Promax Electrònica and dualStream study and implement the possibilities of DVB-T2, the second-generation digital terrestrial television standard, in its optimized version for mobile terminals (T2-Lite) and using new transmission bands (UHF). This standard allows for better use of the radio spectrum and better coexistence between fixed and mobile TV reception. CAT.T2 project partners develop all the elements of the value chain: the header, transmission and distribution network to reception and signal measurement. During the MWC, the consortium is setting up a field trial that covers the Fira de Barcelona with mobile and ultra-high-definition (UHDTV-4k) services simultaneously.

COMPANY/ Free-viewpoint Immersive Networked Experience (FINE)

ADDRESS/ Avinguda Diagonal 177 | 08018 Barcelona

WEBSITE/ www.projectfine.eu

CONTACT/ Jordi Alonso | +34 678 600 216
jalonso@mediapro.es

The **Free-viewpoint Immersive Networked Experience (FINE)** project will focus on researching and developing a novel end-to-end architecture for the creation and delivery of a new form of live media content. FINE will introduce the concept of live free-viewpoint content to provide rich and compelling immersive experiences by allowing remote viewers to place a virtual camera in a real live-action scene and move it freely in space and time, thus heightening their sense of presence and reality. The FINE Project is partially funded by the European Union through the program FP7-ICT-2009-4 and its partners include Mediapro-Spain, KTH-Sweden, EDM-Belgium, BarcelonaMedia/UPF-Spain, Bitmanagement-Germany, AbertisTelecom-Spain, Tracab-Sweden and EUS-Belgium.

MASS Factory is a spin-off of the UAB that designs solutions and provides services for universal accessibility focused on supporting urban mobility in smart cities. Its services allow the disabled and the elderly to gain independent mobility using urban transport.

OnTheBus is an accessible application for smart guidance using public transport or on foot. The application offers turn-by-turn guidance from a point of origin to a destination and provides relevant data for the user along the trip. OnTheBus was built to be used by all users, regardless of their functional capabilities.

GOVERNANÇA RADIOELÈCTRICA

COMPANY/ Radioelectric Governance

ADDRESS/ Carrer de Salvador Espriu, 45-51 (Polígon Pedrosa) | 08908
L'Hospitalet de Llobregat (Barcelona)

WEBSITE/ www.liferadioelectricgovernance.cat

CONTACT/ Xavier Flores | +34 935 574 000 | xavier.flores@gencat.cat

The main objective of the **Radioelectric Governance** project is to improve general access to wireless communications networks, particularly wireless socioeconomic activities, and to ensure that the deployment of these networks is sufficient, orderly, sustainable, and respects people and the environment. The four-year project (2010-2014) is co-funded by the European Union through the LIFE instrument and includes emission control actions, information for the general public about electromagnetic fields and how radio communication systems work, and the generation of social consensus on the deployment of wireless communications networks.

MOBILE WORLD CAPITAL™ BARCELONA

On 11 July 2011, Barcelona was named Mobile World Capital for the seven-year period from 2012 to 2018 because it is a leading city in the deployment of mobile technological solutions.

The Mobile World Capital project receives support from four partners: The Catalan government, Barcelona City Council, the Spanish Ministry of Industry, Energy and Tourism and Fira de Barcelona trade fair center.

The aim of all these partners is to promote projects in the following four activity areas:

› Mobile World Congress

Designed to raise the visibility of the mobile sector and help it grow. The Congress has been held in Barcelona since 2006 and is currently the most important mobile congress in the world.

› Mobile World Festival

To make end consumers more aware of mobile technologies through participation in and the promotion of cultural and sporting events, and with the direct support and participation of international renowned organizations and events such as FC Barcelona and the Sónar Festival.

› Mobile World Center

- › Mobile Events to engage the public
- › Spaces to experience new mobile services
- › Presentation and launch of new products and solutions
- › Conferences on mobility and technology

› Mobile World Hub

The Hub will be the headquarters of the Mobile World Capital, as well as GSMA in Barcelona. There will also be space for other companies to room temporary, as well as will host the Capabilities and Solutions working teams. The MWHub will be located in the MediaTIC building, in Barcelona's 22@ technological district. This area is structured around five concepts for technological solutions, known as Competence Centres:

- › mSmart City
- › mHealth
- › mWallet
- › mTravel

mContentA sixth Competence Center, m4All, will provide a response to projects involving mobile solutions for society's most disadvantaged groups.

ACCIO

Competitivitat per l'empresa

Generalitat
de Catalunya

ACCIO it is the Agency offering support for the competitiveness of Catalan enterprise. It is attached to the Ministry of Enterprise and Labour of the Government of Catalonia, working to promote innovation, internationalization and attract investment

ACCIO functions

- › To create companies, foster entrepreneurship and business promotion in technological activities
- › To increase the number of regular exporting companies
- › To diversify and consolidate internationalization markets of Catalan companies
- › To boost the capacity and the innovative demand of Catalan enterprises (R&D&I)
- › To offer knowledge transfer and incorporate research and new technologies into enterprise
- › To promote talent and creativity
- › To develop business competitiveness

To promote internationalization ACCIO counts on a network of 34 Business Promotion Centres across the globe based at the main economic cities, operating in markets spanning 80 states.

Our Business Promotion Centres provide Catalan business qualified support, insight and advice in international trade and investment.

Business Promotion Centres closely monitor market trends and analyse potential risks. Services provided are tailor-made depending on specific company needs and level of presence in chosen markets, from creating demand to giving support in productive investment and logistics:

- Market research
- Search for marketing channels: distributors, agents, customers, etc.
- Search for supply chains: suppliers, manufacturers, etc.
- Search for trade and technological strategic alliances
- Setting up: business location, legal and labour advice, partnership opportunities, etc...
- Trade missions
- Contact follow-ups and business networking
- Recruitment of qualified staff

Many centres also offer guidance to international firms on opportunities and inward investment to Catalonia.

● Business Promotion Center ● Landing Area

www.acc10.cat

TECNIO

Be tech. Be competitive

To promote Innovation ACCIÓ has created TECNIO, the umbrella brand for Catalan technology centres and university research groups dedicated to industrial research and technology transfer.

What can TECNIO offer to your company?

- › Access to cutting-edge R&D capabilities, as a key factor for improving the competitive position of your company.
- › Help your company to develop new products and services
- › Provide you with a wide range of support services for technological innovation
- › Search for Technology and strategic partners

TECNIO, your technology partner

Find the technological knowledge you need with:

- › Specialization
- › Exclusivity
- › Industry-based perspective
- › Results in confidence
- › Business language and professional response times
- › Quality processes and services accredited by the Catalan government
- › Excellent ability to manage complex projects

TECNIO centres available at the APP Planet Pavilion

- › ASCAMM (CTAE)
- › BCIEM
- › BDIGITAL
- › CIT UPC

idigital

Generalitat
de Catalunya

On 22 May 2012, the Government of Catalonia approved a new strategy to fully develop the Catalan digital society as a tool for economic recovery: the Idigital Plan (www.idigital.cat).

The aim of **idigital** is to place information and communication technology (ICT) at the forefront of a strategy to transform Catalonia. We have set the objective of making Catalonia a Digital Innovation HUB to revive the economy and create wealth and jobs.

Idigital is in line with the Digital Agenda for Europe 2020 and concentrates all the agents involved in the development of the digital society in Catalonia. The plan promotes collaboration and coordination between the different agents engaged in this endeavor.

Projects and initiatives of the idigital plan promote the named 5 "I"s, those aspects in which we have to excel in order to face with guarantees our present and immediate future: internationalization, innovation, investment, inclusion and infrastructures.

Digital development around the Impulse projects, initiatives that are able to engage the different agents of the value chain in the next fields:

> **ICT Cluster**

- > Mobile World Capital
- > Smart Cities
- > Digital Content Cluster

> **Citizens**

- > e-Employability
- > Citizen Social Networks
- > Social and Territorial Cohesion
